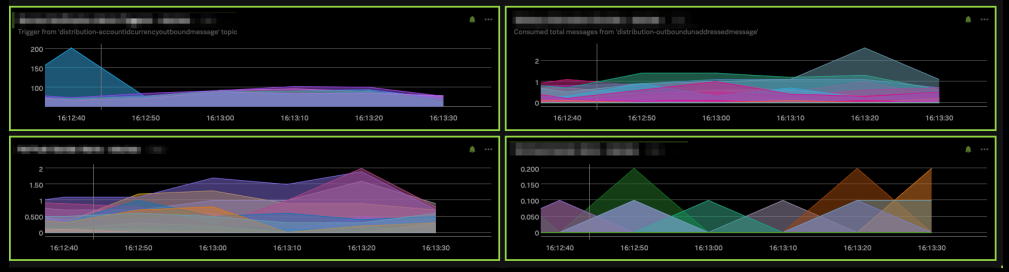
# When building the house, we need metrics

## Exceptions

[redacted] http server request count errors per day (top 5) 2m

| | | |
|---|---|---|
| 18 | AccessControlException \| GET \| CLIENT_ERROR \| 403 |
| 17 | MethodArgumentTypeMismatchException \| POST \| CLIENT_ERROR \| 400 |
| 14 | [redacted]Exception \| POST \| CLIENT_ERROR \| 400 |
| 12 | MethodArgumentNotValidException \| PUT \| CLIENT_ERROR \| 422 |
| 8 | [redacted]Exception \| PUT \| SERVER_ERROR \| 500 |

## Performance



## Own logic

# You learned

How to create:

- Timers
- Counters
- Gauges

With annotation, metrics or builder

# Thank you
